Deep-dive tier / Sonnet dual-triage pool

canonical | likely | low | uncertain / no | Sonnet dual triage

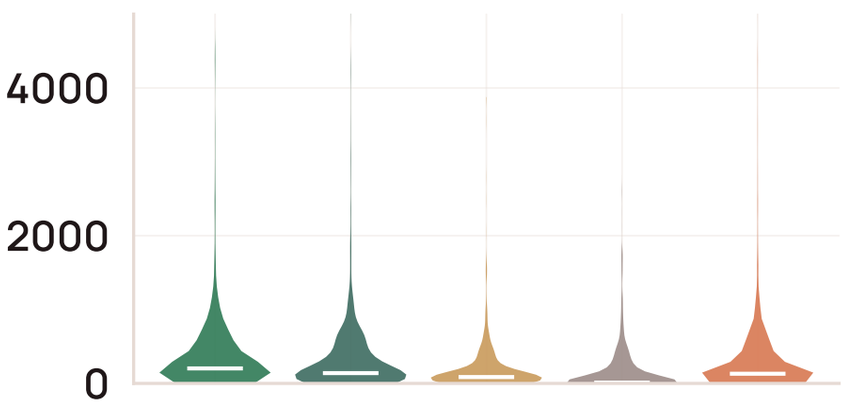

a Number of TM helices

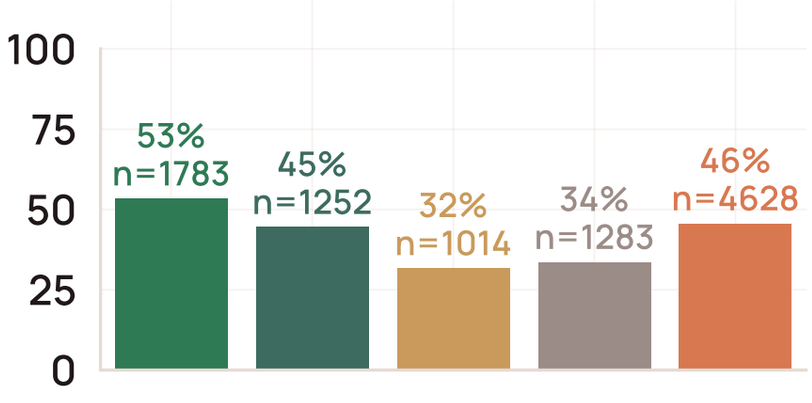

b Protein length (residues)

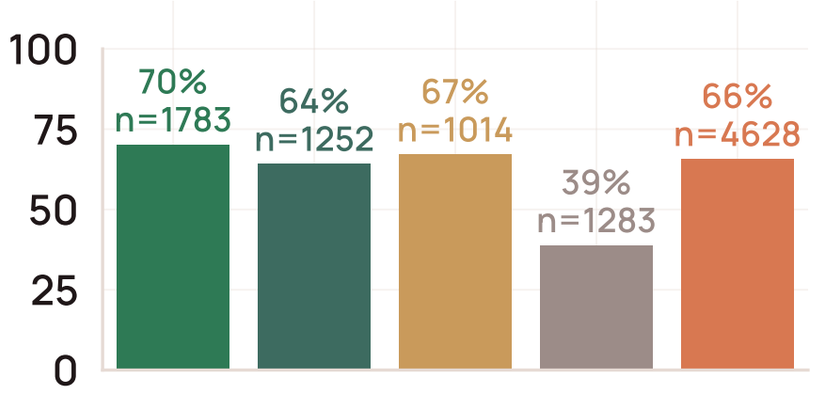

c ECD length (residues)

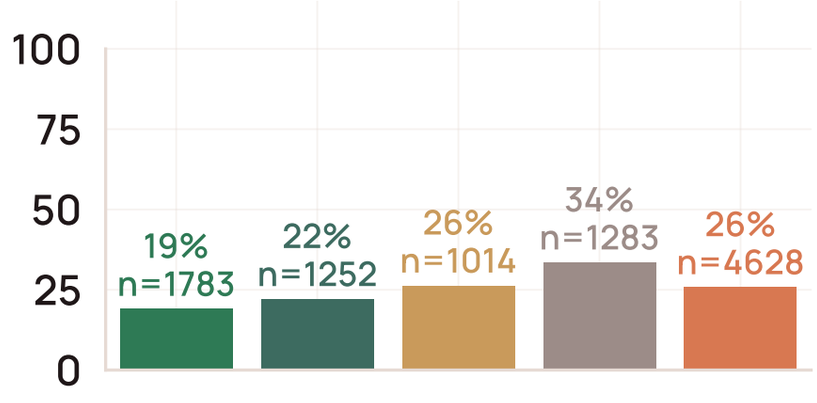

d % with signal peptide

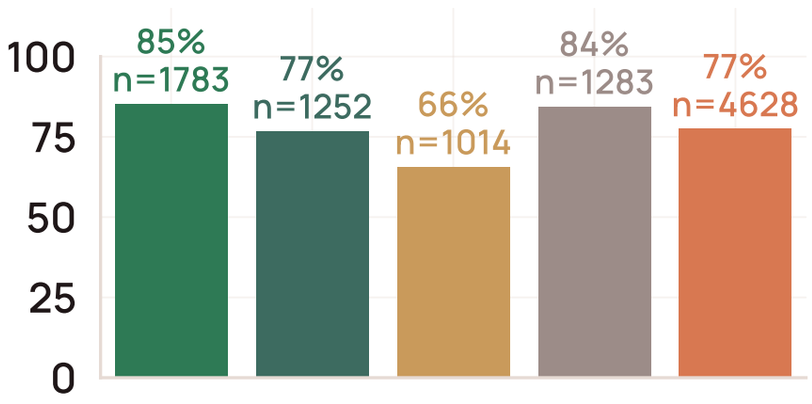

e % N-terminus extracellular

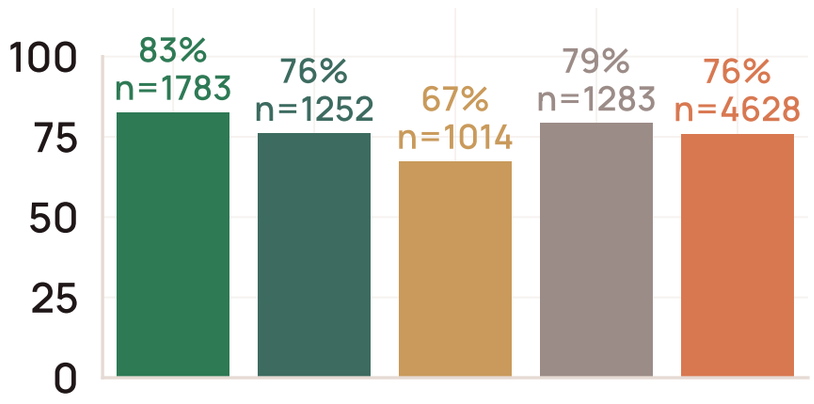

f % C-terminus extracellular

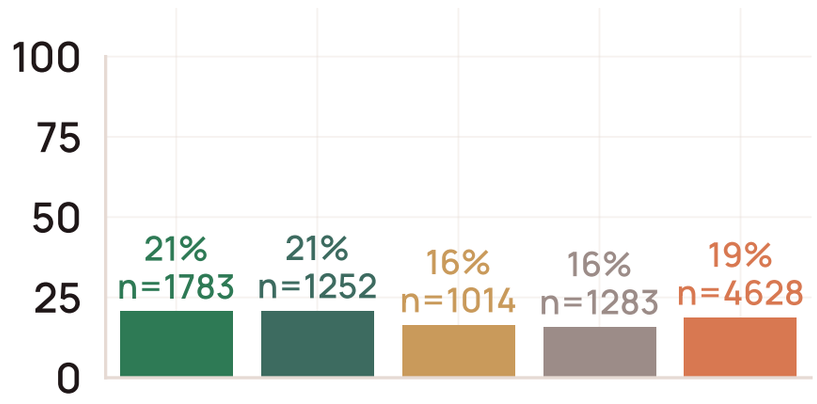

g % with mouse 1:1 ortholog

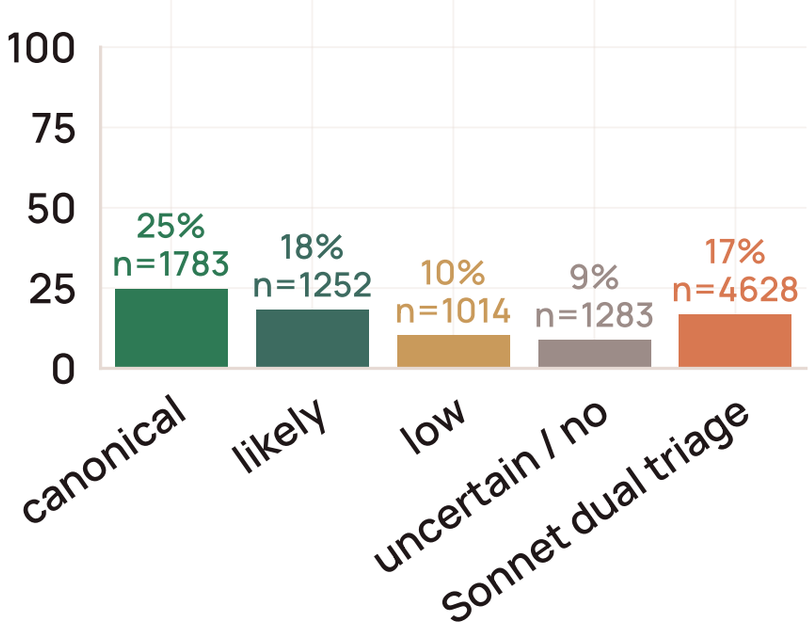

h % with cyno 1:1 ortholog

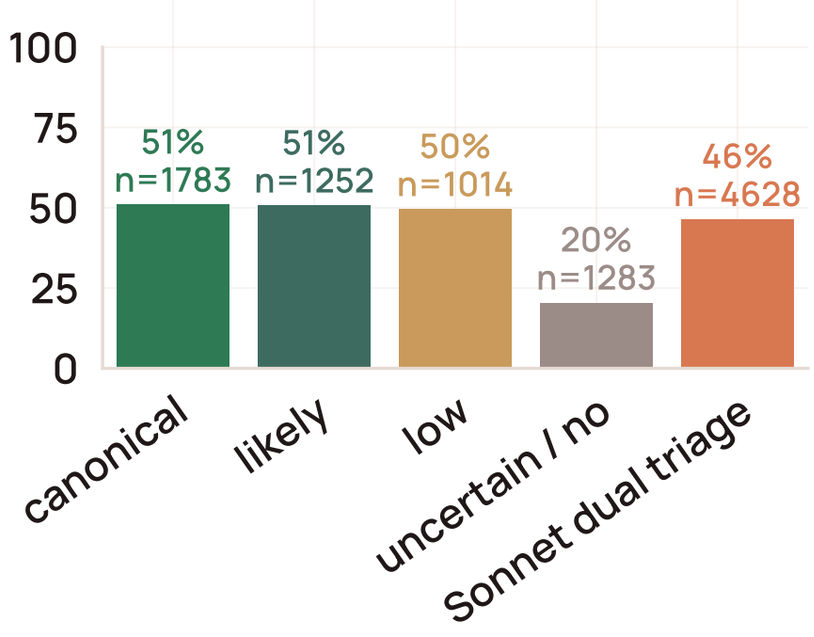

i % homo-oligomer (Schweke 2024)

j % with alt isoform of different topology

k % concerning paralog (ECD 40%+ id)

l % with 1+ extracellular surface-bind site
